

# McHale Fusion 2 - The Key Advantages

## 5. Bale Transfer

1. Simplified
  - Less moving parts (drop roller has been eliminated)
2. More Positive
  - Bottom Door Travels 100mm higher
3. More Clearance
  - Between the top door and bottom door

**The bale chamber has 18 rollers, which results in better performance/ bale rotation in dry crops such as hay and straw.**

## 6. Control Box

1. Has a Large Graphic Display (See Reverse)
2. Features include Volume Control

## 7. Netter Unit

1. Four Bar Stretch System and Better Braking Mechanism
  - better net stretch
  - better bale shape

## 1. Pick Up Reel

1. Has Higher Ground Clearance
2. More Responsive & Better Float
  - (Pick up is on a tractor spool)
3. 900 Nm Slip Clutch
  - (upgraded from 750 Nm)

## 2. Chopper Unit

1. Knife Unit - roll pins are stronger
  - 12mm (upgraded from 10mm)
2. Stronger Knife Bar
  - 35mm (upgraded from 30mm)
3. Knife Pressure Clock fitted
  - Under Density Clock (See Reverse)
4. Rotor Chain Adjuster
  - Spring Type (See Reverse)

## 4. Greaser & Oiler

The amount of oil and grease going to the chains and bearings can be regulated from the control box.

## 3. Chassis

1. Manufactured from Tubular Steel
  - No cross members
  - Less grass build up (See Reverse)
2. Machine is 500 Kg lighter
